ENGINE

John Deere engineered and manufactured 6-cylinder diesel engine features replaceable wet-type cylinder liners that ensure superior heat dissipation and long engine life. A 20 percent increase in low-speed torque means more lugging power and quicker engine response under changing loads. Improved fuel efficiency combined with increased torque lets you do more work with less fuel. The dual horsepower feature provides an optimum engine to transmission match for superior grader performance and traction.

Engine: John Deere 6076A
Rated power at 2200 rpm
 in gears 1-3 155 SAE net hp (116 kW)
 162 SAE gross hp (121 kW)
Rated power at 2200 rpm
 in gears 4-8 185 SAE net hp (138 kW)
 192 SAE gross hp (143 kW)
Turbocharged aftercooled
Number of cylinders 6
Displacement 466 cu. in. (7.638 L)
Fuel consumption, typical
 (depending on duty cycle) 4.0 to 6.8 gal./hr. (15 to 26 L/h)
Net torque at 1100 rpm
 in gears 1-3 (42% torque rise) 572 lb.-ft. (708 Nm)
 in gears 4-8 (42% torque rise) 615 lb.-ft. (834 Nm)
Lubrication pressure system w/full flow filter and cooler
Aspirated air cleaner with restriction
 indicator dual element, dry
Electrical system 24 volt with 50-amp (1400 W) alternator
Batteries two 12-volt with 180-minute reserve capacity

TRANSMISSION

Direct drive, planetary power shift transmission with modulated shift on-the-go speed selections in all eight forward and four reverse gears. There are five working speeds below 9 mph (15 km/h). Standard equipment also includes an inching pedal and tow disconnect.

TRAVEL SPEEDS

(At 2200 engine rpm with 14.00-24 tires and no tire slip)

Shift Lever Position	Forward		Reverse	
	mph	(km/h)	mph	(km/h)
1	2.3	3.7	3.0	4.8
2	3.3	5.3	4.3	6.9
3	5.2	8.4	6.7	10.8
4	6.7	10.8	8.6	13.8
5	8.9	14.3		
6	11.5	18.5		
7	14.7	23.7		
8	25.2	40.6		

FINAL DRIVE

Inboard-mounted planetary final drives are sealed in cool, filtered oil. The operator-controlled differential lock/unlock system allows the differential to easily be locked for maximum traction and unlocked for maneuverability in tight turns. Two-inch (51 mm) pitch tandem drive chains are sized for long life.

BRAKES

Foot-operated hydraulic wet-disk power brakes are sealed in cool, filtered oil. They're self-adjusting and maintenance free. Standard equipment also includes a hand-operated, mechanical dry-disk parking brake. Both independent braking systems are effective on all four tandem wheels.

FRONT AXLE

Heavy-duty, welded box construction.
 Front axle oscillation (total) 32 degrees
 Wheel lean (each direction) 20 degrees

STEERING

A John Deere innovation - all-hydraulic power frame articulation provides maximum maneuverability and productivity. Crab steering reduces side drift, positions the tandems on firm ground, and increases sideslope stability.

Frame articulation (both right and left) 25 degrees
 Minimum turning radius 22 ft. (6.7 m)

HYDRAULICS

The closed-center hydraulic system uses a pressure-controlled variable-displacement single hydraulic pump. Integral hydraulic control valve lockouts eliminate cylinder drift. O-ring face seal and fittings eliminate hydraulic leaks.

Hydraulic pump 6.0 cu. in. (98 cm³)
 Rated flow at 2200 engine rpm 52.4 gpm (198 L/min)

BLADE FUNCTION

All-hydraulic, industry-preferred hand-lever placement of blade function controls (standard equipment). Blade lift controls include a float position. Conversion from two-hand to one-hand control is easily accomplished. Seven blade lift arm positions provide excellent blade positioning capabilities.

BLADE RANGE

Lift above ground	18.5 in. (470 mm)
Blade side shift, right or left	26.9 in. (683 mm)
Shoulder reach outside wheels (frame straight):	
Right	83.0 in. (2.11 m)
Left	85.0 in. (2.16 m)
Pitch at ground line	49 deg. forward 5 deg. back

MAINFRAME

Welded box construction.	
Width, minimum	12.07 in. (306.5 mm)
Height, minimum	10.63 in. (270 mm)
Thickness, sides	0.63 in. (16 mm)
top and bottom	1.00 in. (25 mm)
Weight per ft., minimum	118 lb. (175.5 kg/m)
Minimum vertical section modulus	117 in. ³ (1917 cm ³)
Average vertical section modulus at saddle	149 in. ³ (2448 cm ³)

DRAWBAR

Welded box construction machined for flatness with double ball and socket pivot connection.

CIRCLE

Welded construction, heat-treated for strength and machined for flatness.

Circle diameter	60 in. (1.5 m)
Rotation	360 degrees
Drive	hydraulic motor and worm gear with positive position lock
Sideshift, right	28.5 in. (724 mm)
left	31.0 in. (787 mm)

MOLDBOARD

High-strength, wear-resistant, high-carbon steel.

Length	12 ft. (3.66 m)
Height	24 in. (610 mm)
Thickness	0.88 in. (22 mm)

CUTTING EDGE

Dura-Max® through-hardened steel.

Thickness and width	0.62 x 6.0 in. (16 x 152 mm)
---------------------	------------------------------

SCARIFIER

V-type manual three-pitch position with hydraulic float.

Width of cut	4 ft. (1.22 m)
Number of teeth	5 standard, 9 optional
Lift above ground	21.8 in. (554 mm)
Maximum penetration	13.3 in. (338 mm)
Shank size	1 x 3 in. (25 x 76 mm)

RIPPER

Parallelogram linkage with manual valve control.

Width of cut	8 ft. (2.44 m)
Number of shanks	3 standard, 5 optional
Lift above ground	15.5 in. (394 mm)
Maximum penetration	14 in. (356 mm)
Shank size	2 x 5 in. (51 x 127 mm)

ADDITIONAL STANDARD EQUIPMENT

Engine/Power Train:

Air pre-cleaner
 Antifreeze
 Battery disconnect
 Fan guard
 Fuel filter and water separator
 Radiator trash screen
 Transmission low disconnect
 14.00-24, 10 PR, G2 tires
Electrical System:
 50 amp (1400 watt) alternator
 Batteries with 180 min. (625 CCA) reserve capacity
 Battery voltage monitor

BLADE

All blade sliding components are precision machined for close adjustment with minimum looseness. Replaceable wear strips eliminate component wear over the life of the grader. All structural members are designed to handle both low-speed dirt work and high-speed snow removal.

VISIBILITY

Excellent visibility and low noise, along with numerous climate control options, result in a comfortable and productive work environment. Unmatched visibility to and through the working tool allows the operator to precisely locate and control blade position.

CONTROL CONSOLE

Industry standard control locations with independently adjustable console and steering wheel provide the most comfortable operating position. The electronic monitoring system supplies routine operational information and warns of impending critical function problems before they become catastrophic. New electronic differential lock is located on control console.

DUAL HORSEPOWER

The dual horsepower grader is designed to provide maximum performance in all gears with reduced wheel slip. When in gears 1-3 this unit operates at 155 horsepower (116 kW), in gears 4-8 it operates at 185 horsepower (138 kW). This increased horsepower provides high productivity when operating under heavy blade loads at higher ground speeds.

ADDITIONAL AVAILABLE EQUIPMENT*

THE JDAvantEDGE

JDAvantEdge is a wealth of support programs, parts systems, and dealer resources, all designed to give you the edge. This package of special benefits is a major reason why John Deere offers the "best value" for your equipment dollar.

Best parts support - Twelve regional parts depots in North America and others around the world put parts support near your job no matter where in the world it is.

A computerized FLASH™ parts locating system linking these depots to dealerships can find out-of-stock parts in a hurry and get them into your hands fast. Usually within 24 hours.

Best service backup - Dealer service technicians are regularly schooled, at our modern facility in Davenport, Iowa, or by professionals in the field, to diagnose quickly and repair efficiently.

If they're stumped, a phone call to DTAC (Dealer Technical Assistance Center) puts them in touch with a staff of pros at the factory who help them find a solution quickly.

Best dealers - Your John Deere dealer is an important contributor to the JDAvantEdge. He or she is committed to being the best equipment supplier you can work with.

This is a dollars-and-cents commitment in parts inventory, in service facilities, in field-service trucks. It's a sweat-and-blood commitment in dedicated, skilled, and highly

trained and motivated personnel in each and every department at the dealership.

But what sets John Deere dealers apart from all the rest is something more, a factor somewhat difficult to measure ... a caring attitude, and a sincere desire to be the best at meeting the needs of each individual customer.

John Deere Finance Plans - Whether you rent, lease, or buy John Deere equipment, your dealer can explain the John Deere options available. One-stop options that let you free up operating capital, keep other lines of credit open. More solid benefits of the JDAvantEdge.

Best protection - In addition to the new equipment warranty that meets or exceeds the competition, SECURE® extended coverage, an optional service product for John Deere equipment, is available for repair coverage after the warranty concludes. Full machine or power train coverage is available for a variety of time periods to meet your needs. Consult your dealer for availability and details.

Quality manufacturing - This machine was manufactured at the John Deere Davenport Works, Davenport, Iowa, which has been registered to the International Organization for Standardization (ISO) standard 9001. The Davenport Works has been audited and recognized for its excellence in quality systems by the Quality Management Institute (QMI) and the Japanese Machinery & Metal Inspection Institute (JMI).

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at standard conditions per SAE J1349 and DIN 70 020, using No. 2-D fuel at 35 API gravity. No derating is required up to 10,000 feet (3050 m) altitude. Gross power is without cooling fan.

Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on a unit with 14.00-24, 10 PW tubeless tires, 12 ft. (3.66 m) moldboard with .62 x 6-in. (16 x 152 mm) cutting edge, and standard equipment. Weights include lubricants, coolant, full fuel tank and 175-lb. (79 kg) operator.
